### Category: Inspiration and Encouragement

Dear Reader,

I speak to you as an ally, one of many who watch and wait, wishing you well as you tread the path to greater light, purity and wholesomeness, as you tread the path towards healing.

Healing spreads, both individually and throughout the planet and the environment, but what is it? It is restoration of balance. And what does that mean? In part, it is the cleansing of karma, not only for the rebalancing of humanity but for all of the planetary kingdoms, both individually and between realms as well.

For humans in particular, healing is the binding of old wounds and the dissolution of ties that no longer serve, the softening of toxic entrenchments like tribal hatred and warfare. Healing is forgiveness. Healing breaks ancient curses and brings peace. And peace brings promise.

Healing is your responsibility, yours personally, within your families and your communities, amongst your nations, and ultimately yours as the human race. Only you can tear down the walls that imprison you and hold your souls captive and alone.

Healing is also your prerogative. You can choose to heal and to be healed, both yourselves, in nature and as a planet. It is within your hands and your grasp to let sub-atomic light pour in and raise your vibration.

As you are active during the day, raise your thoughts to the highest, non-judgmental, loving focus. Imagine filaments of light from your heart reaching out to those you encounter, reaching out to the environment and other kingdoms. Just reaching out in love without judgment.

As you meditate, imagine the very cells of your body reaching out to the light with joy, the relaxing joy you feel in friendly sunshine warming you and raising your spirits. Imagine the light surrounding you and seeping into your cells. Imagine all this and be at peace.

You invite the light in by opening to reach out. And as you reach out and invite the sub-atomic light in, you increase your ability to contact and anchor subtle energies for the benefit of all earthly realms. You increase your ability

to contact and interface with us, your many heavenly allies.

Do not be fooled by the harsh “alien” portraitures of us. We are your friends, your brothers and sisters come from afar to help and guide you as part of the greater human family all throughout the universe. We know the way for we once stood where you stand now and faced the same critical transitions, and even the same healing crisis your Earth is experiencing now.

Accept the help, the planetary healing so generously yours for the taking. Yet you might feel that no help is needed. That is your prerogative. Yet even if not needed, wouldn't help be useful? Part of accepting help is the acknowledgment that the help will be useful.

You must recognize that you know of those who are willing to help and have the expertise to help. This you do unconsciously among yourselves. You determine whether or not you need help for this project or that one. And you determine whether or not someone is offering help. And then you determine whether or not the ones offering help are qualified to help.

So far, it is no different with us. The difference begins with the laws we must obey on our side, the laws that are clear about the fact that we must be invited to help.

Know that you are not alone, that we, your Off-Earth Allies and the Community of Spiritual Masters, are close and drawing ever closer at your behest. The groundwork is laid. And we are ready to work. What remains?

We await a clear, unified invitation, the cry for help that has been spoken of since the beginning of this year. And we await the beginnings of the Global Network of Light. These combined empower us to assist you in the ways that will be most effective.

Your friend,

Omstara  
(from the constellation Cygnus)

### Category: Challenges Facing Humanity

It has become evident that healing is one of the most important goals today, not only for the environment but also very blatantly as concerns humanity itself. Healing must occur on a societal scale and that requires monumental change. The old institutions no longer work.

Attention is required at all levels, including karmic balancing. Humanity needs to more clearly understand this and take note. Cause and effect are the basis for much that is playing out today, for better and for worse, even as regards relations between various kingdoms of the Earth. Why, for example, are certain species going extinct? Why is the weather so erratic? But also, on the brighter side, what doors are opening as the devic and human kingdoms draw nearer on their trajectories? And what benefits will the effects of this closing bring to humanity itself?

Just as miracles are relative when you understand more, humanity has to understand more if it is to progress wisely. This is one reason that we, your elder brothers and guides are here now – to orient the New Age, humanity willing. As ever, it is your choice, but as we have said many times before, we need to be before the decision-makers to assist you in the most expeditious ways. We have been soliciting your help to do so by asking you to raise a united cry for our support. Once again, we ask you to voice that request.

So many of your individual healings stem from contact with the soul or Higher Self. That healing is not always successful in saving this lifetime but it is ever valid as the basis for carrying on with the next. The soul, the Higher Self is patient. If the person does individually open to greater soul experience, results differ but the karmic good is ever noted and there is progress, however slow.

The larger goal is planetary healing at this time. Mother Earth is engaged in a difficult transition in her own journey, one that happens to coincide with a New Age transition and all the perturbations that shift incurs.

We encourage you to look at the bigger picture. Whatever personal healing you need, whatever group healing, small or large, formal or informal – all of these need constant and dynamic rebalancing as the overall shift progresses. All of the murk you see arising throughout the planet today is arising to eliminate itself, to self-destruct, to make way, to create space for the new and wholesome. The cauldrons of misery churning in places like Syria are

ultimately producing better results because unity, human solidarity, is breaking out all over as organizations and individuals alike unite to address the devastation being inflicted upon civilian families.

Among those within Syria and among those who unite to offer support, you will find lightworkers. Some of them are aware of their lightworker role and others are aware only of a deep call to provide relief.

Consider the Global Network of Light we presented in the September issue of WeSeekToServe. Consider how the lightworkers in Syria and countless other war-torn countries would benefit if that network of light were strong and stable, empowering and sustaining their efforts, enabling us on our side to pour more light into this planet.

So we encourage you to look to the larger planetary picture but also to understand your personal healing mission at this time. Understand the impact you can have by strengthening the Global Network of Light with your efforts to visualize that band of light circling the globe as lightworkers reach out to one another and build that network in both the physical and inner worlds.

We ask again that you join hands – as lightworkers and ultimately as brothers and sisters of the One Human Family. Please build that network with thought and with action. Invite us in and let the healing multiply. This, you have the power to do. That power is yours to exercise.

Yours in faith,

Maitreya

### Category: Growth and Awareness

We highly laud the efforts made to date in the lightworkers' zone, for it has proven in a rather short time to be a most effective approach. We marvel at the unity we see amongst various individuals and idealists. Truly, this Global Network of Light is bearing fruit to the benefit of humanity. Furthermore, it supports our long-awaited arrival as visible participants in humanity's future.

As always, we are prepared to do whatever it takes within cosmic law to help our younger brethren. And as ever we stand vigil, awaiting opportunities to steer you all clear of impending dangers. Alas, there is more going on than we can aid directly, but with this Lightworkers' Network, we can amplify our opportunities and lend our helping hands more overtly while still within the law.

My relationship with humanity goes back long into the ages. I have seen much come and go, prosper and fall away. One thing remains the same ... Mother Earth is suffering and we together need to heal her and her population. There can be no more noble a job and indeed, all projects we deal with lead back to this ideal. You are all part of this Earth and she is part of you. Collectively, you can heal each other, adopt the healthiest of ways and yield a golden future.

We see the means of this beginning to form. Not all of humanity recognizes just yet the importance of this fact. Some walk a very cavalier path, taking what they want and not giving back something to balance. Life is a give and take. It embodies a simple practice that is a universal law. While this is not lost on many of Earth's population, those who either do not understand this or have yet to accept it walk in numbers great enough to be primary in upsetting the precious balances needed for healthy exchanges. The more light that can be brought to expand the consciousness of these numbers, the more healing that can begin.

Often it is simply a matter of core beliefs and education, at other times it involves an act with economic roots and implications. But there can be no profit had by anyone if the deficit leaves humanity on such a brink of complete failure. Before this happens, we urge you all to consider what you can each do individually, in groups and collectively to strengthen the Global Network of Light and focus on the unity of humanity in order to heal yourself, heal others, heal the environment and heal all denizens who take shelter on Mother Earth's shores, for all who live here have her blessing.

Mother Earth is holding on due to our help and those efforts made by humanity's shining lights who have pledged to heal her environments and then take action to do so. The list is long of those who toil to counteract the damage done by others who have acted without knowledge or without concern.

We gain great pleasure in knowing of those who strike forward with cleaner and clearer efforts. Look to the youth who understand the need for a more conscientious action in how humanity goes about its daily life, for this generation will lead the way in action and inspiration. We truly thank all who make their life an example and who inspire others to also live with cleaner and clearer actions.

The connection to the Global Network of Light might not be obvious, yet as has been said, the stronger that network of light, the more light we can pour into this planet to assist those working consciously to heal the human family and to heal the planet that gives them life.

Thank you, my friends.

Derisum  
(from the constellation Orion)

Category: Challenges Facing Humanity

Dear friends,

The topic we wish to speak about this month is one of great beauty.

It is our wish to ask for your help, the help of the lightworkers of Earth, all in unity, to focus on the issue of healing your world. The purpose of having this Global Network of Light, as you know, is to unite your energies and the light you bring in to focus on improving the situation of the Human Family of Earth. We want to focus all this beautiful energy that you bring in on healing your environment and healing the planet.

It is not the first time that we suggest this should be done and many small groups are individually working on healing the Earth. Now, we want the effort to be made to be bigger and stronger, to be *a united effort of the Global Network of Light* focusing on breaking the crust of negativity that surrounds Mother Earth and on healing the damage that eons of mistreatment has done to the planet. Both things come together.

The soul of the planet is grieving due to all the abuse it is receiving – polluted waters, polluted air, nuclear experiments, the garbage being thrown into the seas or the fresh-water currents. Humanity has always thought that the planet is for its exclusive use. This vision has to change. The planet is a living being and you are living on it thanks to it. In this act of sending light to the planet, you are sending energies of love and gratefulness to her, soothing the effects and the damage of your lack of caring for her.

It is not only about individually changing your behavior towards your environment, towards Mother Earth, it is not only about recycling, avoiding waste of water, waste of electricity, waste of the natural resources of the planet which are coming to an end. That is the beginning and it is an individual effort that is contagious. You can teach people around you, your families and friends, by simply changing your behavior towards the planet. Your individual work will add to the efforts of other individuals working in the same direction, which is very positive.

But you should also work on sending light to heal the planet as a Global Network of Light. Mother Earth wants to regenerate, to be beautiful and to still provide all that her kingdoms need for survival. The planet has its own soul as do other kingdoms on Earth, as do all human beings. All of these

souls need to evolve at the same time.

Your work as united lightworkers is to help this happen. Healing the planet, you heal the mineral kingdom, you heal the animal kingdom, you heal the plant kingdom, you help and heal the Human Family. Clean water that you provide is good for the plant kingdom, whose fresh fruits and variety of cereals in turn feed you and also help to feed animals, which also provide food. A healthy mineral kingdom with no bombing will help support all life on Earth.

Please be aware of the huge damage you can do every time you forget that you are just one of the kingdoms on Earth, not the only one, not the owners of the planet, not the kings of Creation. You have to have this *awareness of unity with all that surrounds you* in order to take care of all that you have been given.

We hope that this first task that we are assigning to the Global Network of Light will be accomplished happily, full of love and enthusiasm. Thus the changes will become apparent in a short time. Please devote some of your daily lightwork time to healing the planet in this manner. We will provide guidance when needed.

Thank you for listening to me.

The Venetian Master

### Category: Growth and Awareness

It is in the nature of the human soul to heal whatever is sick. The human soul's nature tends to perfection, to wellness, to beauty in all of its forms. The human soul suffers with disharmony and negativity, with misery, with everything that is not beautiful, loving, brilliant, healthy. The human soul when incarnated on Earth has to suffer polarity, black and white, day and night, yes and no, health and illness. This is one of the issues that puts more strain on incarnate human beings. However, the wish for perfection is there, the wish for wellness and health, for a clean environment, a beautiful and balanced Nature. It is there in your souls and has always been.

All that manifests in the physical world begins in the inner worlds, the subtle worlds. And it is a truism that light chases out dark. That light is sourced in the inner worlds, in your own souls.

Most of the human beings on Earth dislike what is going on, the damage that is being inflicted upon the planet. The human soul does not like what is happening to the animal and other kingdoms on Earth – species that are endangered, waters that are polluted, experiments with nuclear bombs taking place deep in the oceans, destroying what Mother Nature has taken so long in creating, all that beauty and perfection being destroyed, sometimes forever.

But just as destruction can be virtually forever, so too can cooperation, collaboration and united determination to bring through the light that will chase away the darkness. The seed is there in your soul, the seed of love and wellness, of caring for and healing what is wrong, what is sick. Healing through elimination of the old and the creation, building and sustaining of what is new and wholesome.

So I would ask all of you, the lightworkers of Earth, to share this with your fellow human beings, be they lightworkers or not. Please remember that the tiny spark of light, the seed that loves healing, loves wellness, loves a beautiful world, a healthy environment, a healthy planet ... is there in each and every one of the human beings on Earth. Some unfortunately will never get to know this, but many are waking up and finding this seed of love towards what you have been given, this wish of healing the damage done for eons, healing both by eliminating destructive behavior and by building the new and bringing light into its many forms of physical manifestation.

Please, lightworkers of Earth, help awaken this little flame and desire of healing in yourselves and others, so that no human being is ashamed or scared of expressing their wish for a change in the way the planet and its kingdoms are being treated. Help build the avenues of light that can turn ancient shadows into that which is bright and beautiful.

If each and every one of you acknowledges this desire of your soul, you can and will start changing and healing your world. In the physical, it begins by taking care of your pets, the plants in your house or garden. It continues with your concern for the waters of this planet, for the very air you breathe, with your awareness and concern about policies and practices that devastate the land, air and water.

Acknowledge the damage that has been done and, more urgently, acknowledge the power you have as individuals, as lightworkers, to contribute to the changes that bring deep healing. Acknowledge those individuals and groups and organizations who are striving for change. Acknowledge each other as lightworkers and the objectives you have in common.

You are a spark of light in the Global Network of Light that we spoke of in September. Consider that. Consider then how you, working within that network, can foster and strengthen the necessary changes in the behavior of the human family in the physical worlds. Give way to the light of love, the light of healing inside you and begin the change with small steps. If all of you start doing this, there will be a significant impact on the health of your planet and its kingdoms. Healing will reach all levels of life and consciousness in the planet.

Remember that light and love and healing are contagious. Awaken your own flame and share the news with all the people you know, family, friends and other lightworkers. Help to build and strengthen that Global Network of Light and thus help us strengthen your efforts to make these changes.

Thank you.

Master Hilarion

### Category: Inspiration and Encouragement

For the days to come, we offer these simple words of inspiration ... that the healing of yourself will be the healing of your world.

Truly, at no time in history has this fact been so crucial, so critical to the survival of humanity. We will continue to encourage a healthy and healing approach in all matters that concern civilization and its advancement.

Let's take for instance the case of refugees streaming in from various Muslim countries to Western countries, asking for aid and homes. This is a re-balancing of ancient karmas, a healing of ancient wrongs and ill relationships. As populations mingle rather than slaughter each other, co-habit rather than lay waste, these instances bring healing on a soul level.

The unrest of eons of unhealthy relationships with each other and the environment must be atoned for in various ways as is now demonstrating. Humanity has advanced in some ways of thinking and this is now possible. Peoples of different means who once vied to not respect each other's ways can now in many instances live in relative harmony in many places of the world. This is an act of healing, an act bringing humanity closer to its source.

Today, environmental studies make the case to address issues of how humanity can live co-operatively with the environment ... an approach by more advanced humanity to ensure that all survives, that all is healed and living a healthy co-existence. For to be truly in existence, one must always consider the environment as a factor.

People need to be recognized for their existence, but equally to recognize how all fit together, how all in manner and attitude towards co-existence will achieve a healthy world. And we need to achieve this now for the shift in the Earth's surface is becoming more and more evident. Humanity is witnessing the unfoldment of many ages coming back to bear their cross.

Our plan is to help humanity achieve a level of health within themselves and throughout their interactions – with how they manage their actions involving the soil upon which they stand, the waters from which they draw, the skies whose air they breathe. All must be understood to be of vital importance.

Great values are placed on the survival of humanity, great values indeed. We seek to place these values before you for your own understanding. And we

of course hope for your speed and ease in recognizing this fact. The simple value of healthy mind, body and spirit, of healthy relationships and interactions is fundamental. We know that all understand this at some level, but what we urge you to consider is just how vital this fact is to your future. Let us work on this together.

Let us begin this work with the Global Network of Light. There is here a dynamic self-help spiral for you and a door-opening spiral for us. As you who are concerned lightworkers turn to the building and sustaining of a global network that anchors light on this planet, we can send through stronger and more effective light energies. On this, however, we must work together, and together this work will enhance the health and well-being of this planet and all her kingdoms. Do not underestimate the potential of this unified global network. Do not underestimate our determination to work with you and to heal this world.

Thank you.
