

WE SEEK TO SERVE – FOCUSED THEMES

The Emergence – Phase One

One of the first lessons learned by those of us working daily with the Community of Spiritual Masters and the Community of Off-Earth Allies is that plans rarely seem to go exactly as they expect. Our human free will decisions close some avenues of progress and open detours, or even unexpected new paths. It is safe to say that we, on the human family side, had our own set of expectations of all the emergence would provide.

Now that the emergence has begun, it is time to summarize evolving expectations and focus on the current outlook.

We'll begin with an updated definition of the emergence from the Earth Advisors – those from the Community of Spiritual Masters and those from the Community of Off-Earth Allies combined. Then we'll take that definition and expand upon it phrase by phrase, concept by concept, adding depth to the succinct definition. With few exceptions the information comes from the Earth Advisors themselves, who merged and spoke with one voice. Comments by the production team will be identified by brackets [xxxx] where these remarks begin and end.

One reality to keep in mind is that the emergence is unfolding in phases and we are currently in Phase 1.

The Emergence – What It Is

For us, your Earth Advisors, the emergence is energetically coming closer to humanity, frequency-wise, and coming as a team. The emergence is having recognizable light bodies, recognizable patterns. We each will have a replicable pattern that we adhere to.

And we will have, seek out and attend more meetings in more venues than we have done since the time of Atlantis. We will become more openly involved in giving information to humanity's leaders than we have been. We are simply becoming more involved with providing advice, information and guidance.

The emergence will take root when those leaders we contact in groups are ready to acknowledge the same, as a group, in public. Until that time, the emergence will be in its infancy, but it will be born.

We would like to emphasize the importance of these additional meetings and additional venues and acknowledge the fact that this phase will unfold at a pace determined by humanity's free will. We must be patient until the groups we meet with are ready to come out in public.

We will keep people posted on the events. Some of those individuals who serve as our voices will attend these meetings and will be able to report, if not details, at least the fact that the events occurred. Those who serve as our voices will meet with the attendees and be able to serve as liaisons between us who are Earth Advisors and the leaders we meet with.

The Emergence - Phrase By Phrase

The emergence is energetically coming closer to humanity, frequency-wise and coming as a team.

The importance of coming as a team of advisors is to emphasize that we are not separate, unrelated entities who show up from time to time speaking with various groups, various individuals. The important point is that we work *together* for the good of the plan for this planet, for the good of humanity since the good of humanity is encompassed by that plan.

Those among us who are formal members of the Community of Spiritual Masters on Earth have been working with those who are from the Community of Off-Earth Allies, advisors who have been assigned to Earth for millennia. We work together for the benefit of the plan of this planet and the benefit of humanity.

We are a team.

The emergence is having recognizable light bodies, recognizable patterns. We each will have a replicable pattern that we adhere to.

[Additional information from the WeSeekToServe production team based on information received in unpublished channels]

Maitreya, Yeshua of Nazareth, Mother Mary, St. Germain and others have appeared to many, spoken to many. How and why, you might ask, are the light-body patterns of the Earth Advisors any different?

The easy answer is energy expenditure. Our elder brothers and sisters

from the Community of Spiritual Masters have the ability to construct ad hoc light bodies and appear before us. The ad hoc light body is discarded after the appearance.

However, if the Earth Advisors had a different face, age, height and build for each meeting they attended, we would find that a bit unsettling. So the Advisors have agreed that they will each create a specific pattern for their light body and use that pattern each time they appear. That way, if world leaders attend two, three or more meetings, the Advisors will look the same at each meeting.

Creating and re-using a consistent pattern requires more energy expenditure than does creating a disposable light body because using a pattern demands deeper penetration into the dense physical than does the ad hoc approach (a fact that we who are incarnate must take on faith). The fact remains that the deeper the penetration into the dense physical, the more the Advisors are forced to lower their frequencies. The larger the gulf between their normal, high frequencies and the lower target frequency, the more energy it requires to cross that gulf.

If you have ever deliberately raised your energy frequency and then tried to hold that higher frequency for several hours, you get the idea. Achieving and holding a different frequency is not quite so easy as it sounds.

And we will have, seek out and attend more meetings in more venues than we have done since the time of Atlantis.

In the time of Atlantis, there were places, designated, energetically cleansed and maintained meeting places where we met with humanity. They were scattered about so that we were readily accessible. You might say that these places had the equivalent prevalence as do postal services now. That will do – the equivalent of post offices, postal stores that people could come to and know that we were there.

Now, we would also, upon request, be available for designated meetings. In Atlantis, we generally did appear in light bodies. And when I say “we,” I simply mean those who were at that time at the same level of spiritual maturity as the current Community of Spiritual Masters is now. The specific individuals were different, for most of

those who were at this stage in the time of Atlantis have moved on. They have completed their Earth lessons and moved on.

We will not have, in the immediate future, specific places where we will be. But eventually, that is what we hope to have.

We will become more involved in giving information to humanity's leaders than we have been.

It is safe to say that we will focus initially on the political-economic leaders as changes in that realm, in those united disciplines, will have the most immediate effect. And the changes in those united disciplines will serve as guideposts for the leaders of other disciplines and will impact the work of the leaders in other disciplines. That is why we focus there first.

Together, the political-economic leaders and the leadership in various other disciplines will present to the bulk of humanity a solid and quite new framework for moving forward into the new civilization.

We are simply becoming more involved with providing advice, information and guidance.

Focus of the discussion

As Earth Advisors, we will paint a picture of what we foresee for the human family of Earth if changes are not made. We present options, viable options in our minds, for moving forward and propose what must be changed in the existing civilization – culture, relationships, key organizations – if indeed the necessary course correction can be made.

These are open and frank meetings.

We also present who we are and what services we offer as these changes are made as well as the services we offer in support of decisions to change that are made. We make it clear that our advice, our guidance, our information will be made readily available. We are not going anywhere. We will support the decisions that are made by humanity's leadership and bring forward additional information as it is needed. We will be there to work *with* the leaders in the decisions that they make for changes of direction. We will not make any of the decisions.

This is where we wish to make it clear that it is our intention, and at this point our requirement, that individuals who serve as our trained voices – designated individuals we have been working with and training – be at these meetings. These trained voices will be available to liaise between the meeting attendees and us. They will be available.

Regarding our trained voices

You can say that we are working with those who have soul commitment to provide us with a voice and to serve the emergence. We have not yet contacted all of them. To date, we have a small number prepared to attend meetings and serve as liaisons. Others will develop over time.

[From a group of trained voices]

In most cases, training requires individual daily practice and periodic group practice. It is a serious commitment on the part of the Earth Advisors to do the training and a serious commitment on the part of the voices (aka channels) to attend the training.

The training includes, but is not limited to:

- Physical attunements to raise vibrational capacity so that it is more closely aligned with the frequency of the Advisors. The side effects of these attunements vary from one individual to another. For some, they are quite painful, for others there is rarely any noticeable consequence.
- Practice to enable reliable recognition of the energetic signatures of many different members of the Community of Spiritual Masters and many members of the Community of Off-Earth Allies. For the most part, each member of the team who works with WeSeekToServe capably and reliably recognizes the signatures of all panelists – currently 26 – and can provide a voice for each of them.

In addition, there are beings who speak through us who are not panelists, so we have been trained to reliably recognize and deliver messages from these different sources as easily as we recognize different family members, friends, acquaintances, colleagues and co-workers.

- Practice to reliably offer each Speaker a variety of technical means to deliver the message. The two basic categories are vocal messages and telepathic messages. Each category has

sub-divisions.

- Practice standing aside so that the resulting message is the Speaker's message, free of opinions held by the voice. The Speaker, however, draws on the voice's personal experience and expertise as well as the library of the voice's mind for vocabulary and concepts. The variations in libraries of mind available to the speaker is the reason some messages can be delivered more accurately through one voice than another.
- Commitment to expand one's library of mind by researching disciplines and/or specific topics as requested.
- Training as a group so that there is close communication among the group members such that each member offers approximately the same frequency range and freedom from personal opinions.

[End of information from a group of trained voices]

Future Phases

We have several alternatives to propose in future phases. However, we are focused on the first phase of the emergence at this time. Which alternative we implement will depend on the outcome of Phase One.

[Comments from the WeSeekToServe production team]

We have been told that WeSeekToServe.com is an important vehicle for the messages the Earth Advisors wish to convey to Earth's human family.

Eventually, they wish to have four more websites, staffed by different production teams but each equally capable of delivering their messages. They wish these five websites to work together, sharing the messages the Earth Advisors wish to present to the human family.

At this point, however, expanding the Advisor's Internet presence to five websites is not a priority.
