Winter 2017

New Beginnings

This Month's Panel:

Mother Mary ... 2

Lord Maitreya ... 4

Venetian Master ... 6

Sartarius ... 9

Mother Mary ...

Category: Inspiration and Encouragement

I address you, my dear readers, devoted followers and lightworkers who during all these years have been faithfully following our communications, our messages. Observing, assimilating, learning and collaborating with us, the Community of Spiritual Masters and our Off-Earth Allies, to bring new light into the human family of Earth, to bring peace to the spirit of all humans, to bring harmony to planet Earth.

All our efforts these years have been directed to awakening consciousness, to bringing new knowledge, to helping and guiding you to change your way of understanding the spiritual world, of feeling at one with your brethren and feeling the unity of the human family. That is to say, we have been endeavoring to bring forth the change of consciousness that is going to take you to feeling like one family.

Many steps have been taken to that effect and much has progressed throughout the years. If I look back to the beginnings and watch the results now – the Global Network of Lightworkers, the increasing number of people collaborating with us, of lightworkers that are doing their small or big part to increase the frequency of Earth, the frequency in the human family – when I see the amount, the great number that you are, I feel extremely pleased and proud of the work that has been accomplished between your efforts and ours.

We have reached a turning point in our relationship with the human family. This is the last issue of WeSeekToServe in this format. Times change, technology changes, and we too must therefore change and adapt to modern times. That is why we are planning and assessing the fact of using social media to reach more people in a quicker and a deeper way. Our messages will be shorter and more frequent, more direct, and we would like to promote bilateral communication, from us to you but also from you to us. Times change as I have said and we adapt to those changes.

I hope that this new way of communicating with you, about which you will be informed when the time comes, is acceptable and agreeable to you, is fruitful and will help us all to achieve the objectives that we pursue – the absolute and total union of the human family as *one family*.

I hope you will follow us in this new adventure.

My blessings to you all.

Mother Mary

Lord Maitreya ...

Category: Inspiration and Encouragement

There must come a time when our process requires that we alter procedures and perceptions in order to “upgrade” our situation, adapt to the steps already taken and raise our advance to a whole new and higher level. That time is fast approaching and we honor this with high adventure for it was not always this certain that it would be achieved.

The time has come, and we confirm that it is through the collective efforts of lightworkers, mustering with all their might to filter through and expand the energies of light to benefit humanity as a whole, through their endeavor to defeat the negativity and prove that the light is prevailing. Prevail we must and this is our declaration and announcement of the ensuing and expected next stage of that prevailing. I say this with high feelings and praise for what we had hoped would happen, and for the state we call upon to press on yet even further, for we are not out of “hot water” just yet.

We can however breathe a sigh of relief, we can congratulate you collectively, and we can take a calm intake of breath as we proffer suggestions to carry on this noble process. Buckle up, my colleagues, and brace your resolve. Please celebrate that yet more renowned and lofty advanced beings have ennobled this process with their joining presence. We celebrate in our circles and encourage you to take this news to heart and allow it to strengthen your resolve, knowing that so many have agreed to take up the cause of humanity succeeding.

Indeed, vast numbers of advanced beings have guided humanity, our brethren, our younger brothers and sisters, since time immeasurable. Along the way, more took up the grade and laid down groundwork for our relationship to expand and advance a further step today upon that footing. This fills us with great hope. We are inspired yet again by actions on both sides of the spectrum, a bonding of family members great and small, yielding to the needs of the time.

As we continue to grow in our relationship, we must continue to grow in our techniques of communication. We have been talking for some time of current media challenges and methods, and we feel enough has been said about the fact of modern communication standards. We speak of something more firmly grounding and that can only be done with our expanded presence.

What does this mean exactly? We have a team, whom we have closely adjusted and trained, who have agreed to be our stalwart human collaborators, outstandingly present to encourage our presence. We have, until now, spoken to you through the voices of our reliable human companions, and now you can expect a new level of communication to enable a deeper bond and connection with all of us. It cannot be expressed just how significant this stage of development is, nor our gratitude to all groups involved, for it extends as far and wide as is lawfully abiding.

Embrace this new age of brotherhood, far and wide, and expect to hear of further developments cementing the process in our favor. We humbly thank each and every one of you for your efforts. We humbly acknowledge the surpassing of milestones that were once at the level of “just a hope,” yet stand today as a firm achievement. Let us look to this for background and attunement and set forth strengthened in this fact.

Align, align, align.

Maitreya

Venetian Master ...

Category: Inspiration and Encouragement

Dear Readers,

There are many ways that communication can be enhanced between us and you. The use of panel discussions has been important to us because of the way we present the fact of the core, the difference between the core truth, the core reality and how each of us interprets, works with and expresses progress made on that particular core principle so that you could see consciousness from several different perspectives. That you could see the soul evolution from many perspectives. That you could see the human situation on planet Earth today from many perspectives, that you can see the whole of the global network of light and the hard reality of the institutions that need changing.

You have given us a chance to share this with you. This we appreciate. The time has come that we can now move forward. The core will always be there. The principle of varying views of a given topic will always be there. Yet right now, we are eager to be speaking more frequently than is practical when we limit ourselves to panel discussions in the way we have been doing in these past years.

So we move on. Our means of communication will evolve.

And we hope will become even more integrated, that the messages we deliver will become even more integrated into your daily lives. For we are in the end teachers. Every one of us. And what we are teaching is evolution, evolution that enriches the growth of the soul of the human family of Earth.

We have over the years spoken of how you in your individual lives have power to create your own environment, power to bring about changes that you would like to see in your life, in the environment in which you live. And we have beat the drum about the changes that are needed globally. All of this is true. I would ask that you remember each individual one of you has the power to help one another, the power to smile, the power to let the love of the universe flow through you and out into the world. You have the power to let the light that permeates the universe flow through you and out into the world. You have the power to look for, to observe, to notice others who have the light and love of the universe flowing through them and make that

connection and thus strengthen your own power as you join with another who has that power consciously.

The most challenging is when you feel alone. And you look around and you think, "I am the only one who understands. I am the only one who sees. I am the only one trying to bring light and love to the situation." And that can feel very lonely, very lonely indeed. And when you feel that way dear reader, when you feel that way please call on one of us, call on all of us. And you know that by the very act of saying "Please be with me, please help me bring through the light and the love," you acknowledge that you are not alone.

And we will hear you. And the light and love might arrive in a way you have no way of anticipating, in a way that you do not expect at all. But it will arrive. And if you and your heart look for that little spark of light and love that proves you are not alone, if you look for that, if you believe that and are alert to that, you will see. Once you ask, I would implore you to be alert to what is happening and alert to the fact that your request has been addressed, perhaps in entirely unexpected ways.

Look for and be alert to the response and you will know you are not alone. There are hundreds and thousands of other lightworkers in this world each bringing through love and light. You are not alone. They are there. And you are there for someone else who feels they are alone. You are there shining love and light into the network that circulates throughout the entire human family. And when you are down and out, you can ask and be able to draw on the light and love that others are pouring into that network.

This is what I would like to say in closing this particular phase of our communication with you. There is much change that is needed in the institutions of the human family in order to accomplish the sharing that is needed. Remember always that you are not alone in seeing the need for change. The actions you take are yours to decide but you are not alone.

I thank you for listening all the times you have listened to what it is I have to say. We all thank you. And we look forward to finding new ways to deliver our messages. New approaches. Our objective is to deliver messages more frequently. Our objective is to step forward and be recognized as elder members of the family to which you belong and take up our responsibility as elders, as teachers. That is what we will do and I personally want to thank you for letting us step into your lives and deliver the messages we have delivered.

We will be moving forward together you and us. We are not leaving. We intend to come closer. So be alert. We will find ways of communicating. We

will be there. We are not leaving you alone. We will be there and find joy in discovering how else it is we will be able to deliver the messages we believe will inspire, will expand your consciousness and awareness and when you are ready, will help you take a frank and open look at the challenges facing the human family.

When you put all that together, you will understand in what ways every single day you are truly empowered to bring through light and love, and what you do with that light and love is your decision. And I smile and I offer you my deepest blessing. I look forward to what it is the coming year will bring in the ways that we can move forward together.

Thank you.

The Venetian Master

Category: Inspiration and Encouragement

A new era is coming, a new time, and very soon, a new beginning in how we who have counselled and assisted from behind the scenes will be relating with lightworkers everywhere and the human family in general. And as you have heard, your brothers of the Community and we, your Off-Earth Allies, will be adopting new means of communicating with WeSeekToServe readers in particular. So I would like to take the occasion of new beginnings to address some broader communication issues.

The next level of consciousness for humanity, the New Age, will be inaugurated and built beyond the rational mind, through the faculty called intuition. One way to access that faculty is imagination and the faculty to “go there,” to take yourself to higher realms, to access and interact with other dimensions – to leap, believe, and find your footing.

Good scientists, visionary ones, have always known and experienced that abstract thinking occurs in a whole new dimension that is just as real as any “reality” commonly perceived. Other dimensions are there to know and scale. They are in that place you can sometimes touch in the quiet, intense moments of your inner life. Sure, there are the vagaries of the astral, there is illusion, but at the same time, there is overture. And this intuitive opening is where the contact lies with us, your friends and guides, and much possible advancement for the human family of Earth.

Please do not denigrate the inner realms and dismiss them as “woo-woo” or worse still, treacherous astral fantasies. This attitude of the past has done some if not much harm, and created much useless deferment by keeping people stranded in comfortable but limited dimensions of the rational mind. Part of the mission of the current generation is to escape from that sterile judgmentalism, those limits, and learn to soar.

If it begins with the childhood worlds of dragons and unicorns, so be it. Where is the harm? It is all practice in stretching your mental wings and you might be surprised to find remnants of truth in the old fairy tales. It is time for humanity to wake up and explore such realms and put weight to them.

Allow yourselves to stretch, to go beyond, to explore and trust. Open your hearts and minds to the new and wondrous that await you. Climb into the

light of intuition, be dizzy for a brief moment as you adjust to all the possibilities opening before you. There, in the just beyond, you will find us, your friends and allies both old and new. We stand ready alongside you to open the doors to those new realms of achievement that are now just over the horizon.

Please accept this opportunity and stay tuned. We will be in touch in many new ways.

Your friend,

Sartarius
