## Working Together

THIS MONTH'S PANEL:

LORD MAITREYA ... 2

MASTER KUTHUMI ... 4

SHO ... 6

PHILOHSTAN ... 8

MOTHER MARY ... 10

OMSTARA ... 12

## *Lord Maitreya ...*

Greetings, my dear friends,

In recent issues, we have outlined the urgency of your plight and we have offered a solution.

This month, we would provide a glimpse as to how we might work together to instill the new course of reclamation, righteousness and joy. On all fronts, my friends, wherever a human talent exists, we can potentize it a thousand fold and, at your request, will show you how to do so. This is exactly what we wish to do, but the law remains clear: you must take the first steps. You must act first and we cannot interfere unless you, with one voice, ask us to do so.

How do you take those first steps?

Look to us for inspiration as you would to an island of safety in the quicksand. Recognize the new light among you and rally quickly to our ranks. Seek out the banner of Justice and brandish it with all your might. Opt for true sharing and watch the walls that imprison you crumble into ruin. The old forms are dead and dying. Do not shore them up. Drop your fears of the future and let them go. The quicker, the better.

Look to and foster the young for they are come to inherit the Earth. Is it any wonder so many of them embody the voice of wisdom? You stand aback at the creativity of the new generation and rightly so. Adopt then their courage to risk all and yet step sure-footed and resourceful into the future. They are the fertile ground that your tears have watered as you grope for the light.

Empower your women for they are the driving force, the engine of change in every society today – the grandmothers who would not give up, the schoolgirls who would not remain silent. Half the world can no longer live in shadow if you would survive. Harken well to these words and deny them no longer.

Pay attention to the panorama of scientific and technological advances rushing at you now at avalanche speed. The onslaught of medical discoveries unprecedented ... where do you think these have “suddenly” come from?

Honor those seeking to better care for Mother Earth and all her beauty and resources. They, like the scientists, are receiving much direction and insight from the Devic Kingdom that sustains the forces of nature.

Honor also those who study the ancient past for much will be revealed to them with our coming that will unlock the secrets of the past and create a platform for re-integration and unheralded progress for the human race from this rekindling.

Most of all, recognize yourselves as one human family and be not afraid to reach out to the many star families who care deeply about you and have been working behind the scenes as long as have we, the Community of Masters.

Our role is to guide and assist Earth's human family, to work side by side in brotherhood and collaboration. Make haste, dear friends, to claim your birthright and let us stand beside you at the helm of the new time that is yours to create.

Maitreya

## *Master Kuthumi ...*

Dear Readers:

The storm that is coming must be weathered together for maximum retrieval of resources to survive insurmountable odds. This is what I would like to outline. Humanity does not fathom what they are in for at this time, what challenges are coming to meet them. But equally, they do not fathom what help, aid and collaboration also stands with them to meet these challenges. We are that help, we are that aid, we are that expertise that will turn the tide in your favor and help you to surmount these challenges.

It is we who but remain invisible forces that will be the key to humanity stepping forward with a fighting chance. Thus we ask humanity to remain optimistic and ask for our help, ask for our aid, as we shall be there full-mark strength, ready and available, capable and resourceful, honorably and in brotherhood.

Yes, this may seem too good to be true but we are here and awaiting your clear, unified invitation forthwith and then we can bring forth a plethora of unimaginable strengths to help humanity fight the fight for the better future, the new, re-built future. That it cannot be accomplished alone we feel is obvious, but to the humanity of the old ways, this is not yet thought about.

We are ahead in knowledge, which is one of the strengths we bring you. We are ahead with experience of this exact transformation, for we have dealt with it many times ourselves and thus forth have helped others also to do so. We are ahead in understanding what a civilization needs to survive, having helped many others take this turn successfully. We are bluntly your best chance.

We are presently standing at guard, awaiting your participation so that we can take action on your behalf, so that we can strive together to solve this evolving puzzle.

My forces amassing are skillful in the maneuvering of survival in times of warfare, the warfare with nature. Decisions will need to be made that take into account facts that humanity cannot decipher, facts that humanity cannot yet fathom, intricacies of minute knowledge that we can see, we can perceive, we can tally. Our eyes range in vaster ways to see things humanity is not yet skilled at seeing, or have the knowledge to see or perceive. This is not your fault, just your lack of intrinsic skill set.

Simply said, humanity needs experts in subjects they have yet to conceive of as being pertinent to their survival and cooperation with nature and evolution. Humanity cannot respond adequately without some grasp of these perceptions, and that is where we come in with a full retinue of skills. We can provide these perceptions to solve the greatest of problems that humanity will face in the coming days. We cannot only help perceive, but also can help navigate and thenceforth help you to review issues that lay at the cause of many difficult issues.

My many thanks for your efforts today to digest this information and then perhaps share it so that more and more people know they need but join together and, with one voice, one intent, *ask*. Then, we shall be permitted to help. We consider it our privilege.

Thank you.

Kuthumi

## *Sho ...*

We begin by expressing a preliminary preference to make some open-ended remarks concerning the balance of forces needed to be successful in this age to come. Humanity simply cannot build its success without the teamwork we offer to benefit all of humanity, not just its leaders and the privileged. *There is no success without all succeeding*, and these facts should be understood.

As forces reshape your world, many considerations will have to be taken into account, and they will bear witness to the naked fact that things are changing in bigger ways than can be handled judiciously. We think you (humanity) will quickly begin to see that you are in over your collective heads and will need help getting your affairs sorted out.

We do not wish to seem superior and pompous for this is not the case. We are simply aware of facts that you as a civilization are not collectively aware of. And we wish to be of service when you are more aware. Well, we wish to be of service before that, but we can expect you not to ask for our help until you realize you really need it.

We can understand that you (humanity) may prefer to be self-sufficient in dealing with your problems. You think you know better how to handle what is going on, but the fact will be seen that you do not, and this is why you cannot be successful without our help. We are not bragging. We simply state this fact for we have seen it many times before.

This is not a new game for us. We are all familiar with the painful growing effects coming your way and we can help alleviate some of the unnecessary suffering quite easily if you would but hear and heed our advice. We stand waiting for you to extend your hand and voice your plea for us to take this measure, and we will indeed be of service in any way we can within laws of the universe. We are your friends and come here to make your survival a success.

We truly hope that you will not take a long stand in this offer, for the sooner you are willing to take it up, the better chance of alleviating some painful steps. It is humanity's call at this juncture, but we stand fully available and charged when this call comes in.

Our forces are great in number of willing souls, brandishing our swords to fend off the greatest of challenges. We lead by example, with experience and knowledge gleaned from previous action. What better allies can you find than ones who have such skills, knowledge and the will to serve the purpose of assuring your grace?

May my words trigger and encourage you to ask for our help. May my explanation be sufficient to bear this fruit, for the strength of your united call for help will capture our attention and garner permission for us to stand at your side more visibly and with greater effect.

Please waste no time. The time is fast approaching the day of challenges and we can be putting our skills to the test as soon as we feel the bond of humanity's hopes and wishes.

Thanks you, thank you, thank you.

Sho  
(from the Pleiades)

## *Philohstan ...*

It is my desire to speak to the WeSeekToServe audience about this month's topic, "Working Together." It is a privilege to address you once again.

On other planets, in other worlds, work has been done and still is done through cooperation. It is well known that working in collaboration is easier, more productive and completed sooner. Everyone understands that there are different levels of awareness, of knowledge throughout the universe and therefore, nobody is surprised or bothered if beings with a higher level of knowledge offer to help and assist those civilizations that need it because they are at a lower level of evolution. This doesn't mean imposing ideas or rules on anybody, it doesn't mean that some are better than others. It simply means that there are different levels of growth and awareness.

Those who are on a higher level of knowledge and awareness know that part of their evolution involves teaching and serving, and that serving means assisting and guiding. In every universe there are cycles of learn-serve-teach, and everyone goes through those same cycles. No one is surprised that some of us offer our assistance to teach or assist others, and it is not dishonorable to need teaching. The entire universe is a continuum of growth in knowledge, awareness and light, and all of us as well as you, the human family, contribute to this expansion and growth.

We find ourselves facing a human family that is very much in need of help to change the things that are not working on their planet and in their civilization.

Now that the time has come to cooperate and work together, and for us to connect with your decision-makers, we have found a certain arrogance and mistrust toward help coming from off-Earth and other dimensions. Arrogance in the sense of these leaders thinking that they know best, as well as fear of the unknown, therefore shutting out the possibility of working together in harmony, the human family and us, your Off-Earth Allies and the Community of Spiritual Masters.

Arrogance, fear, mistrust and sometimes ignorance are characteristic of the ego and the mind. Mind and ego totally prevent the expansion of awareness in human beings and so, many of you and many of your leaders are not capable of understanding the significance of the help and assistance that you could receive, the significance of the close cooperation that you could be experiencing with us.

Working together means that you gain a flow of knowledge, of technology

for progressing, of ideas and advice that we from a more evolved position in the journey of return to Source can provide the human family to help you come out of your present chaos and move forward.

It is necessary therefore that your decision-makers, but also each and every one of you as members of the human family, discard those fears, those suspicions, that arrogance and that ignorance of the universal laws. You must leave behind the tricks of the mind and the ego to be able to develop and widen your awareness of what it means to be in intense cooperation with others throughout the universe.

Fortunately, there are many members of the human family who are already following this path. The awakening of the intuition, the moving forward and the expanded awareness are contagious, and so these gifts slowly expand, like an oil slick. The levels of expanded awareness in those human beings who are already following this path are raising the general vibration of humanity.

I pray you not to stop this escalation and sharing and to keep passing on the perception and awareness of what could turn out to be a fruitful collaboration between the human family and us. The advantages are immense. The change you are facing would speed up. You would swiftly reach a viable situation for the planet and make life for the human family more bearable, more manageable and sustainable, and more pleasant.

Do not give up on your determination to expand your awareness and pass on your insights, assessing and communicating with whomever wants to hear of the innumerable advantages that our working together and collaborating as brothers and allies in this magnificent mission would bring.

We, as usual, are awaiting your unified request for help as explained in the March issue and are looking forward to collaborating with you, the human family.

Thank you.

Philohstan  
(from the constellation of the Eagle)

## *Mother Mary ...*

My dear children:

My colleagues have said much about the perilous transition you have entered and about the gifts that we, your guides and allies, have to offer in easing your path. They have spoken of our upmost desire to be by your side and assist you through the shoals.

May I suggest that what is most needed for this to occur at this time is quite simply a change in the collective heart of humanity.

A change of heart so that you recognize that you are not alone, that separation is an illusion, that you are One Human Family which is part of a much larger family that loves and cherishes you.

A change of heart as well, whereby you fully realize that your current political and economic structures, no matter how intricately entrenched, are corrupt, are obsolete and serve no one, not even the privileged few who now tremble at the precariousness of their privilege or shoulder on complacent or oblivious of the karma they are heaping on their own backs.

A change of heart whereby you can simply allow for the possibility that your fate is not sealed under these controls, that you can rise above the drudgery, the despair and the utter exhaustion that so many of you are experiencing now. This is occurring now because you are sensitive beings caught in the death throes of the current civilization. But deep in the human heart is much of resiliency. When you allow for the possibility, when you but glimpse, you will realize that you can escape all this and live in dignity.

Can you allow for the possibility? Will you open your hearts to the hope and trust that what we are telling you is true, that our help is yours to seize and command?

Imagine living in dignity, each and every one, as a beloved child of God, whatever name you ascribe. Imagine greeting the day knowing that you have been heard from above and that you count – that whatever you are freely doing to build the new world makes a difference and will be leveraged one hundred fold. You have all the tools and ingenuity required. Together as brothers and sisters you can marshal the will to get it rolling.

A new world is forming in the wings, on the horizon, underground. Despite all appearances, many are the green shoots now rising of justice and rightful sharing. Be not distraught.

I ask, dear reader, that you look deep into your own heart. What is it you would like to contribute? What is your deepest longing for the new time?

With love and wisdom, we await your answer. We stand knocking at the door that only you can answer. Greet us, your loving elders come to serve, and consider now what role you can play in this great awakening.

Your loving Mother Mary

## **Omstara ...**

My colleagues and I have been insisting on the need to have the human family request our help and presence in order to be able to assist and collaborate with you. We suppose that many of you will be asking yourselves: How can this collaboration take place? How can these beings from other dimensions be able to reach us?

Well, here is the answer: an increase in the vibrational frequency of each and every person in the human family brings as a result an increase in the vibration of the family as a whole. This allows you to reach other realms where the vibration is more subtle, and it is in those realms that we dwell. It will be the similarity of the vibration between the human family and ours that will foster and make easier for us to share all that we can offer for your evolution and progress.

We on our side are doing our part of the work making it possible for us to descend to denser vibrations and therefore get closer to the vibration of humans on Earth. It remains for all of you to work on increasing your own vibrations to bring them closer to ours. There is a thin veil that separates us from you but it is not insurmountable and all our efforts and yours must be directed to unifying those vibrations.

How can each person contribute to raising the vibration of the human family? Well, evidently it is an individual job as we have already said. It is the sum of many individual efforts, of all the individual work, that is going to raise the energy of the planet. If each one of you has the awareness of what you are – that is, light and vibration – if each of you is aware of your soul, of your Higher Self, and works on improving that vibration and that communication with the Higher Self; if each one of you watches your own attitudes, your behavior towards others; if each person strengthens the love within themselves, their self-love and self-esteem; if each person improves their love towards others, their fellow human beings, the sharing and the empathy; if you practice gratefulness ... all of this would bring an immense joy to the human race and contribute to raising your souls' vibration.

As the vibration rises, each person will be more capable of perceiving the subtle realms where we dwell and will be able to receive personalized information to improve themselves and move forward ... and consequently to improve, move forward and heal the problems and chaos existing on Earth. Thus it is one person's individual work plus another individual's work, plus that of another and another ... the sum of many individual works, and later on the work of groups, that will make the rise in vibration so great that it will make it possible to communicate with us. We look forward to this.

Every day, more and more people in the human family are working on this goal, more and more groups are gaining the awareness that the only way to progress is by living in a different way, feeling differently, experiencing joy and happiness, living in peace, justice, equity and sharing.

That change in behavior means having the awareness that you are One Family where all of you are siblings, where all of you are souls that have come to Earth to accomplish soul growth. If you develop that team consciousness which is lacking on Earth, you will become a great team, the One Human Family team, and it will be *an only team* and *an only family*. It is not about the Turkish family, or the Syrian family or the American family or the African family. It will be one family only of human beings living on planet Earth, and as such you must begin to behave.

Do not forget that work begins with oneself as individual work, and as individual communication with us to enable all of us to work together towards getting Earth out of the chaos in which it is immersed.

Receive my blessings and know that we have pinned all our hopes on you and on the possibility of finally starting to collaborate – on working together, you and us.

Thank you.

Omstara
